

Dear Manager and/or Owner:

Jupiter is going Healthy... In an effort to make Jupiter a healthier community we invite you to participate in the **Healthier Jupiter Eating Smart Partner Program**.

Healthier Jupiter is a community initiative funded by Palm Healthcare Foundation that addresses health and quality of life issues starting with diabetes. We selected diabetes because promoting healthy lifestyles can lower diabetes risk and complications as well as many other chronic diseases.

This initiative has four steps:

- Increase awareness of diabetes risks and promote healthy lifestyles
- Help individuals make healthier food choices,
- Become more active,
- Access necessary medical care.

This is a recognition program that helps adults and children make healthier food choices. The **Healthier Jupiter Eating Smart Partner Program** encourages restaurants to highlight their healthier items.

Participating restaurants will be provided with a door decal, program materials, analysis of menu item recipe, and promotion through the Healthier Jupiter initiative

Why participate in the Healthier Jupiter Eating Smart Partner Program?

- Free Advertising – Healthier Jupiter website, social media, press releases, event marketing & participant decal to display on entryway.
- By joining this voluntary program, you will be helping to raise public awareness, support healthier lifestyles, promoting your healthy partnership.
- Your establishment can play an active role in the health of the community.

Becoming a Healthier Jupiter Restaurant is simple and free. The Program provides numerous benefits to your customers. Your concern about their health will create goodwill and invaluable “word of mouth” promotion. By participating you can help the residents of Jupiter live longer and healthier lives by offering healthier food choices.

Please complete the attached application and send to Carrie Browne at 1025 Military Trail, Suite 200, Jupiter, FL 33458 or email carrie.jupiter@healthiertogetherpb.org.

Sincerely,

Carrie Browne
Healthier Jupiter Project Director
